

The Economic Value of Predictable Database Performance

82% ROI

over **5 years** for performance-critical database (OLTP) and analytics (OLAP) consolidation

KAMINARIO K2 ALL-FLASH STORAGE ARRAY

**PREDICTED 5-YEAR SAVINGS
AND BENEFITS FOR A
MODELED ORGANIZATION**

(versus ALTERNATIVE All Flash Arrays)

\$564K

See how the benefits of consolidating performance-sensitive database workloads onto Kaminario K2 Storage Array dramatically outweigh the cost of acquisition, resulting in a large ROI when compared with other flash technologies.

[LEARN MORE](#)

ESG's Economic Value Validation modeled the five-year fully burdened costs and benefits of deploying Kaminario K2 Storage Array versus other purpose-built AFA technologies.

The analysis included interviews with Kaminario customers and stakeholders, end-user case studies, and ESG qualitative and quantitative market research with IT decision makers.
