

Three tips to make my storage more resilient in an unpredictable world

Not all flash solutions are created equal. Kaminario doesn't just keep your business online 100% of the time, it understands and adapts to your data center's changing workloads for superior storage availability. Command your ship.

DELIVER OUTSTANDING RESILIENCY

From high-volume, low-margin retailers to global banking corporations, every business requires 'always-on' storage to maximize operational performance and secure their advantage.

YOUR 3 ESSENTIAL TIPS FOR BUILDING A SMARTER, MORE RESILIENT STORAGE STRATEGY

TIP 1

DEPLOY DATA CENTER-AWARE STORAGE

Delivering high availability storage for the highly heterogeneous workload environment of the modern data center requires more than simply focusing on speeds and feeds.

TIP 2

Go from NDU to NDE

Just non-disruptive upgrades (NDU) are not enough anymore. Deploy a storage solution that provides non-disruptive everything (NDE) including seamless and non-disruptive capacity and performance scaling.

TIP 3

Demand SLA guarantees

Avoid All-flash solutions that cannot guarantee 99.999% availability. Many vendors talk a big game, very few back up their promises with written guarantees and remediation for the vendor.

EXCEL AT AVAILABILITY WITH KAMINARIO

How does Kaminario deliver the best enterprise availability in the market?

The Kaminario K2 solution is designed for always-on availability

- Unique RAID implementation and multi-domain redundant components drive 99.999% availability for your critical data
- K2's DataProtect ensures the highest level of availability and protection of your data through its set of rich data services

Ours is the most complete, perpetual upgrade program in the industry

- Zero forklift upgrades
- Zero complex data migrations
- Zero autonomic, non-disruptive rebalance
- Zero downtime while upgrading

We give you data center-aware storage

- Cloud-based Kaminario clarity simplifies and optimizes storage health management for workloads including Oracle, VMware, Microsoft and more
- Performs analytics in the cloud, so Flash controllers focus on storage throughput
- Ensures hardware failures never impact availability

We provide cast-iron availability guarantees

- The DataAssurance™ Performance ensures your K2 will deliver 99.999% uptime, if not we provide additional support at zero cost

CUSTOMERS BUY INTO OUR AVAILABILITY PROMISE

Clearwater Analytics

Investment portfolio provider

- Reconciliation load times reduced by 75%
- Long-running report load times improved by 65%
- Improved customer satisfaction

“

We felt that many of the pure flash arrays were either too costly or not production worthy. Kaminario impressed us as being both enterprise-ready and cost-effective.

”
