

# Kaminario Cloud Fabric

## All-Flash meets Software-Defined

### KAMINARIO CUSTOMERS HAVE SEEN:

Utilization improved  
by over  
**75%**

Acquisition costs  
cut by over  
**50%**

Three year TCO  
decreased  
by over  
**60%**

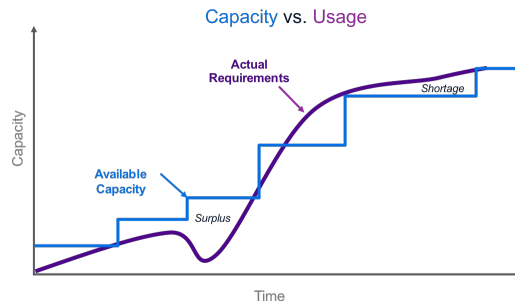

Kaminario is changing the way IT thinks about building cloud-scale storage infrastructure. Combining proven, best in class technology with the dynamic agility of a software based solution and economic flexibility of an as-a-service model.

Cloud Fabric is Kaminario's unique software defined composable storage solution, delivering proven all-flash storage capability within a flexible software defined model. Infrastructure operators and service providers can grow storage capacity in line with their business - **Better matching costs with their revenue models and creating incredible financial flexibility.**

Kaminario Cloud Fabric runs on certified industry standard hardware, available on-demand and ready to use from TechData a global distribution giant. Storage capacity is monitored through a cloud-based analytics platform with flexible billing based on actual capacity consumed.

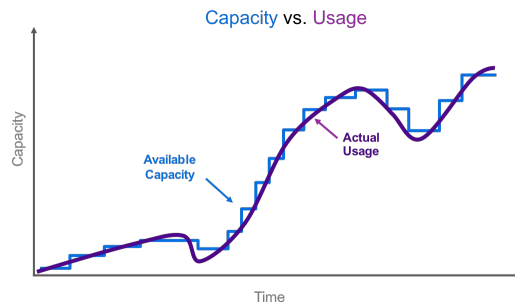

## Traditional Storage Array Growth Model

- Traditional storage arrays lead to surplus from over-provisioning and shortage when demand grows
- Surplus = Waste
- Shortage = Customer Dissatisfaction

## Deeper Value with Cloud Fabric

- Minimize surplus caused by over provisioning
- Grow storage infrastructure proportionally with business growth
- Scale down software licenses as requirements decrease
- Match demand with supply
- Easily reallocate physical resources as needed

### Contact

Contact a business development representative to answer any questions you may have.

### Schedule a Demo

Schedule a demo with an engineer and learn if Kaminario's solution works for you.

### Request a Quote

## Kaminario Cloud Fabric

Kaminario Cloud Fabric delivers the same enterprise level features and functionality that has seen **Kaminario named as a Leader in the Gartner Magic Quadrant for two years in a row** while being **ranked highest in the Gartner Critical Capabilities Study** for workloads such as **On-Line Transactional Processing, Virtualization, Analytics and High-Performance Computing.**

Kaminario Cloud Fabric is built on the software pillars of:

Storage resource optimization and control

Storage resource orchestration and automation

Predictive analytics, machine learning and monitoring

## About Kaminario

Kaminario is making the autonomous datacenter a reality, letting customers stay focused on scaling their business. Kaminario's composable data platform delivers the agility, scalability, performance, and economics that global organizations demand to stay competitive in a cloud-first world. Real-time analytics, datacenter automation, and assured data access let our customers power their mission critical applications and safeguard their digital ecosystem. Headquartered outside of Boston, Kaminario works with an extensive network of resellers and distributors, globally. For more information, please [visit www.kaminario.com](http://www.kaminario.com).
